20ft Expandable Container House - 36 m2

Model / configuration: 20ft / nominal 36 m2

A nominal 36 m2 expandable container house with a documented folded and unfolded format. Discuss a room layout, fixtures and optional exterior details for your project.

Documented configuration

Nominal model	20ft / 36 m2
Unfolded external dimensions	6320 x 5900 x 2480 mm
Folded external dimensions	2200 x 5900 x 2480 mm
BOM dimensional area	37.288 m2
Area note	36 m2 is the nominal model label

Configuration reference, not a signed order specification. The illustration may show optional features. Measurements and packing details must match the selected model.

Prepare a useful quotation request

1 / Site and intended use

Country and destination port; accommodation, office or other use; available space; target arrival date and required quantity.

2 / Drawings and supply scope

Confirm external dimensions, room arrangement, doors and windows, wall and roof build-up, floor, fixtures and any electrical or sanitary items. Identify what is supplied and what is completed locally.

3 / Packing and installation

Request folded or packed dimensions, weight, package count and loading plan for this model. Confirm unloading, lifting equipment, foundation support points, assembly and utility responsibilities. Standard detachable loading and assembly figures do not apply automatically to this model.

4 / Documentation and approval

Match certificates or material reports to their stated model and scope. Approve the drawing revision and material list before production. Destination-specific project acceptance must be confirmed separately.

5 / Support

Minimum order: one unit. Three-year online warranty and after-sales support. For product issues, required replacement parts are supplied free with the next order. Confirm coverage and any separate shipping arrangements in the order agreement.
