Building spaces. Supporting projects.

Container houses, prefabricated buildings and supporting systems for contractors, camp procurement teams and distributors.

Factory supply since 2015

Start with the intended use, destination and required capacity. We help define a suitable building system, configuration and packing plan for your project.

Explore current products

Project photograph from Longtai's supplied media library. It illustrates an available building arrangement; project-specific specifications are agreed separately.

Detachable Container Houses

Component-based container buildings for site offices, accommodation and custom combinations. Start with our documented 5950 × 3000 × 2800 mm export configuration, then adapt the layout and finishes to your project.

Explore configurations

Folding Container Houses

Hinged modular units that unfold from a compact transport arrangement. A practical product family to consider when deployment method and repeated movement are central to the brief.

Explore configurations

Images show product or layout references. Included fittings, finishes, dimensions, performance requirements and shipment quantities must be matched to the selected quotation.

Flat Pack Foldable Container Houses

Flat pack foldable container house configurations for project accommodation, offices and site facilities. Confirm the model specification, supplied scope and site requirements for your order.

Explore configurations

Expandable Container Houses

Container-format buildings with expanding side sections. Choose among nominal 27 m², 36 m² and 72 m² models, then discuss bedrooms, shared living space, bathrooms and exterior options.

Bring us your brief.

01 / Define the project

Tell us your destination, intended use, quantities, room arrangement and target schedule. Attach drawings or a bill of quantities when available.

02 / Confirm the configuration

Agree dimensions, frame and enclosure materials, doors, windows, finishes and the included fit-out. Check project requirements and the scope of any supplied documents.

03 / Plan packing & installation

Confirm loading quantity, transport arrangements, site access, foundations and installation responsibilities for the selected model.

04 / Stay connected

Our team provides online installation guidance and after-sales support. Keep your approved drawings, material specification and order details together for reference.
